

Bipolar Disorder

IS YOUR CHILD TAKING MEDICATION FOR BIPOLAR DISORDER, BUT STILL SUFFERING FROM SYMPTOMS?

A clinical research study in your area is testing an investigational medication for bipolar I disorder in children and teens.

Children and teens enrolled in this clinical study may continue on their current prescribed medications in addition to receiving the investigational study medication.

STUDY PARTICIPANTS MUST BE:

- » 10 -17 years old.
- » Diagnosed with bipolar I disorder.
- » Currently on a stable dose of a bipolar medication but still experiencing symptoms.

STUDY PARTICIPANTS MAY RECEIVE, AT NO COST:

- » Comprehensive study-related psychiatric evaluation.
- » Investigational study medication.
- » Compensation for time and travel.

At all times your child's information is treated confidentially.
